

EXTREME DA CLOSES \$7.38 MILLION SERIES B FUNDING ROUND LED BY FOUNDATION CAPITAL

Palo Alto, Calif. — April 4, 2007 — Extreme DA™ Corporation announced that it has raised \$7.38 million in its Series B funding round, which was led by Foundation Capital. This investment round consisted of a combination of new cash investments and the conversion of a bridge loan. Extreme DA is an emerging leader in next-generation integrated circuit (IC) design solutions that improve manufacturing yield and address the increased process variations present in the latest generation of semiconductors produced using advanced nanometer processes.

“Timing closure is often a challenge for chip designs in smaller process geometries,” said Mike Schuh, General Partner of Foundation Capital. “Extreme DA’s variation-aware timing analysis tools provide the optimal performance and faster timing closure that’s necessary for designs manufactured at 65-nanometers and below.”

In addition to lead investor, Foundation Capital, IT-Farm Corporation and Lanza techVentures participated in this funding round. Extreme DA CEO, Mustafa Celik, said of the investment, “Our customers have told us that faster timing closure, more accurate timing analysis, and parametric yield improvement are essential to their continued success. With this capital, we plan to support customer demand by increasing our research and development efforts and expanding our worldwide sales channel and marketing program.”

About his firm’s investment, IT-Farm Corporation President, Morio Kurosaki, said, “The semiconductor industry in Japan is driven by high-end consumer electronics. Chips for this market sector have formidable requirements for quality, fast yield ramp-up, and short design cycles. Process variations at advanced technology nodes are a major barrier to meeting these goals. Extreme DA has technology that addresses design problems by accounting for process variation. We are glad to participate in the funding of the company.”

According to Lucio Lanza, Managing Partner, Lanza techVentures, “This round of funding is an endorsement of Extreme DA’s technology leadership and its potential to be an essential

part of the platform for complex digital designs. The company plans to continue to expand its breadth of products and accelerate the growth of its business.”

About Foundation Capital

Founded in 1995, Foundation Capital is a venture capital firm committed to supporting entrepreneurs and their companies, targeting innovative opportunities in telecommunications and networking; Internet infrastructure; and enterprise software and on-demand services. Foundation Capital funds total more than \$1.7 billion. Visit www.foundationcapital.com for more information.

About IT-Farm Corporation

At IT-Farm, technology specialists in both Silicon Valley and Japan analyze young companies and screen their intellectual property to identify those with the highest potential. With our experience and a business network built through actual company incubations in both Silicon Valley and Japan, we support entrepreneurs so they may quickly shape their ideas into superior business models. Visit http://www.it-farm.com/english/e_index.html for more information.

About Lanza techVentures

Lanza techVentures of Palo Alto, Calif., is an early stage venture capital and investment firm for new companies with innovative technologies in the semiconductor and technical software markets. Managing Partner Lucio Lanza is Chairman of the Board of Directors of Extreme DA, and serves on the boards of ARM Holdings plc [(LSE: ARM); (NASDAQ: ARMHY)] Forte Design Systems, PDF Solutions, Inc. (NASDAQ: PDFS) and several other private companies. He holds a doctorate in electronic engineering from Politecnico of Milano.

About Extreme DA

Headquartered in Palo Alto, Calif., venture-funded Extreme DA develops and licenses software products to improve the performance and yield of 65- and 45-nanometer integrated circuits. The company’s investors include Foundation Capital, IT-Farm Corporation, and Lanza techVentures. For the latest news and information on Extreme DA, visit www.extreme-da.com or write to info@extreme-da.com.
